

Department of Geography

Banasthali Vidyapith, Banasthali

Minutes of the meeting of Board of Studies held on 30 September 2010 at 10.00 AM in Conference Room No 209 of Aim & Act Banasthali University.

Following members were invited to the third meeting of Board of Studies in Geography on 30.09.2010.

- | | | |
|----|-------------------------------|-------------------------|
| 1. | Prof. Sadhana Kothari | Udaipur University |
| 2. | Prof. R. N. Mishra | University of Rajasthan |
| 3. | Dr. Rashmi Sharma | Internal Member |
| 4. | Dr. Ashutosh | Internal Member |
| 5. | Dr. Vipin Kaushik | Internal Member |
| 6. | Dr. Khundra Kapam Moiranglima | Internal Member |
| 7. | Dr. Salahuddin Mohd. | Internal Member |
| 8. | Prof. Brij. Bhushan | Convener |

All invited members were present. The meeting began with hearty welcome to the members by convener. As scheduled, the meeting took place in Room No. 209 of Apaji Institute at 10:00 am. After exchange of a few words of greetings, the BOS members, particularly new members, were apprised of the aim and proceedings of the BOS. The members then took up the first agenda item of the given Agenda (Enclosure 0) for the meeting.

Agenda Item 1 : As an action on this agenda item members were to confirm the minutes of second meeting of BOS held in January, 2010. After a few clarifications and a brief discussion the minutes were confirmed (Enclosure 1)

Agenda Item 2 : As an action on this second agenda, BOS members were to reconsider the existing list of Examiners (Theory and Practicals) for any revision. Considering the state and convenience of some of the senior Geographers in attending the examination work, some younger examiners were adopted in place of very senior members as per recommendation of the BOS. The revised list of examiners is placed as Enclosure 2.

Agenda Item 3 : This agenda was on acceptance of continuation of existing syllabus for Under Graduate and also for acceptance of existing scheme of examination for B. A. examination in Geography. BOS members were of the view that the existing syllabi may be continued, together with existing scheme of examination, as it was revised very recently in January 2010. Existing scheme of examination is placed as Enclosure 3.

The fresh syllabi for M.A. / M.Sc. Geography prepared by faculty members of Geography Dept. was discussed from various points of view i.e. volume of new course, its commensuration with course of other universities of repute, semester – wise distribution of course etc.

Scheme of examination was also drawn. Detailed outlines of accepted syllabi for M.A. / M. Sc. (Geography) and the scheme of examination are given in Enclosures 4 & 5 respectively. Syllabi was planned so as to be covered in four semesters as per scheme of examination.

Course for M. Tech (Remote Sensing), Enclosure 6, prepared by Geography Department was perused by BOS members. While appreciating the enthusiasm of dept. and quality of syllabus, BOS members came to decision that such a Technical Post Graduate course be taught by a Department of Banasthali University Office other than Geography Department so that students of Geography after finishing course as high as MA / M.Sc. may feel a sense of completeness rather than of dissatisfaction.

Therefore, syllabi for M Tech (Remote Sensing) was not further commented and was given up for consideration by concerned department's BOS.

Agenda Item 4 : Examiners' report of past examinations of undergraduates were to be evaluated. All the available reports were submitted before BOS members. Members observed high opinions given by examiners and expressed their satisfaction on the reports showing hard work by students.

Agenda Item 5 : Standard of B. A. examinations' question papers was to be evaluated through available Question papers of past examinations. All members expressed satisfaction on continuous improvement of standard of Question Papers of periodicals and annual examinations. The standard was observed to be as high as of any long standing Geography Department of a leading University in India. However BOS members recommended revision of format of question papers of future annual examination so that these are in conformity with the format of many a competitions.

BOS suggested following format: -

- (1) *Every question paper in geography may have first Question as compulsory in ten sub – parts. This constituted section – A.*
- (2) *Under Section – B, there would be five questions each one with a choice. One question (together with choice question) will be selected from each of the five units of syllabus. The examinees will be asked to answer all five questions (availing choice) each one within 100-150 words.*
- (3) *Section – C : It may contain four Questions, one from any four units of syllabi five units. Students will be required to answer any two, each with maximum of 400 – 500 words.*

BOS members had completed action on all the agenda items by 14:15 Hrs, the meeting was closed at 14.30 hrs. Convener thanked the members for their co-operation and suggesting valuable changes given above.

M. Tech in Remote Sensing

I Semester [July – December]

S. No	Paper	Contact hrs/week		Cont. Ass. Marks		Ann. Ass. Marks		Total Marks	
		T	P	T	P	T	P	T	P
1	Principles of remote sensing	4		20		40		60	
2	Fundamentals of geographic information sciences	4	4*	20	10	40	20	60	30
3	Applied statistics & cartography and digital mapping	4	2**	20	5	40	10	60	15
4	Surveying, global positioning systems and mobile mapping	4	2#	20	5	40	10	60	15
5	Computer programming	4	4##	20	10	40	20	60	30
		20	12	100	30	200	60	300	90

TOTAL: 390

* Practical- fundamentals of geographic information sciences

** Practical- cartography and digital mapping

Practical- global positioning systems and mobile mapping

Practical- computer programming

II Semester [Dec – May]

S.No	Paper	Contact hrs/week		Cont. Ass. Marks		Ann. Ass. Marks		Total Marks	
		T	P	T	P	T	P	T	P
1	Spatial database systems, analysis and modeling	4	2*	20	5	40	10	60	15
2	Digital image processing	4	6**	20	15	40	30	60	45
3	Spatial decision support systems	4		20		40		60	
4	Research methodology & project management	4		20		40		60	
5	Applications of remote sensing	4	4***	20	10	40	20	60	30
		20	12	100	30	200	60	300	90

**TOTAL:
390**

* Practical - spatial database systems, analysis and modeling

** Practical- digital image processing

*** Practical- applications of remote sensing

III-IV Semester [July – May]

Project Work: M Tech. RESEARCH DISSERTATION

- Synopsis consisting of relevance of the problem to be studied and its aims and objectives, Methodology adopted to study such problem
- Chapter Scheme
- Review of Literature
- Preliminary base work carried out
- Presentation

On satisfactory completion of the taught component of the course, students will normally proceed for the M.Tech. Research Dissertation must be completed by the end second year. This should be a substantial piece of research work, which both reinforces the skills learned in the taught component of the course and provides a genuine opportunity to undertake valuable research. Each student is required to defend his / her thesis through a presentation in front of an external expert and faculty and students.

1. UIL Project	
Reading Elective –I	40
Reading Elective –II	40
Thesis /Project (Duration 30 weeks)	
Part-I	100
Part-II	100
Part-III	100
Part-IV I. Dissertation & Project	120
II Interim report	50
III Seminar	70
IV Viva Voce	100

TOTAL	720
--------------	------------

GRAND TOTAL =1500

FIRST SEMESTER

PAPER-1.1 PRINCIPLES OF REMOTE SENSING

Section - A

BASIC PRINCIPLES

Introduction: Definition of Remote sensing, Advantages and limitations, Remote sensing process, Electromagnetic Radiation (EMR): EMR Spectrum and its properties, EMR wavelength regions and their applications, Atmospheric windows, Interaction of EMR with matter, Spectral signatures, Resolutions: Spectral, Spatial, Temporal and Radiometric

MICROWAVE REMOTE SENSING

Passive Microwave Sensors, Active Microwave Sensors, Side looking RADAR, Scatterometer

THERMAL INFRARED REMOTE SENSING

Brief Introduction to Thermal Infrared Radiation Properties: Kinetic Heat, Temperature, Radiant Energy and Flux, methods of transferring heat, Thermal properties of terrain: Thermal Capacity, Thermal conductivity, Thermal Inertia, Thermal Infrared Multispectral scanners, Thermal IR Remote sensing examples

Section - B

AERIAL PHOTOGRAPHY AND PHOTOGRAMMETRY

Introduction- Fundamentals of aerial photography, Vertical and Oblique aerial photography, Aerial cameras, Filters and Films, Aerial photography planning Photogrammetry; Basic concepts of scale, object height and length, object area and perimeter, grayscale tone/color of objects, Photo interpretation techniques, Stereo photogrammetry and stereovision, Parallax bar and its applications, Softcopy photogrammetry

SENSORS, SCANNERS AND DETECTORS

Photographic System: Cameras, Sensor classification: Active and Passive, Opto-Mechanical Scanners & Push-broom scanners, Infrared Scanners, Thermal Sensors and Microwave Sensors

Section - C

REMOTE SENSING SATELLITES

Introduction to commonly used multi-spectral remote sensing satellite systems: IRS Series of Satellites, LANDSAT, SPOT, IKONOS, QUICKBIRD, MODIS, RADARSAT, NOAA, TERRA, MOS and ERS, Brief introduction to Weather and Communication Satellites

SPECTRAL DATA ANALYSIS AND RS APPLICATIONS

Spectral Signature and its Response: of Soil, Vegetation and Water, Ground Truth Collection; Commonly Used Ground Truth Equipment-GTR, Radiometric Calibration, Digital and Analog Methods, Brief introduction to Remote Sensing (RS) Applications: in Agriculture, Forestry, Land cover/Land use, Water resources & Earth System Science

TEXT BOOKS

1. Jensen, J.R., "Remote Sensing of the Environment – An Earth Resources Perspective", Pearson Education, Inc. (Singapore) Pte. Ltd., Indian edition, Delhi, 2000
2. George Joseph, "Fundamentals of remote sensing", Universities press (India) Pte Ltd., Hyderabad, 2003

REFERENCE BOOKS

1. Sabins, F.F. Jr., "Remote Sensing – Principles and Interpretation", W.H. Freeman & Co., 2002 Edition.
2. Reeves, Robert G., "Manual of Remote Sensing, Vol. I, American Society of Photogrammetry and Remote Sensing, Falls Church, Virginia, USA
3. Lillesand, Thomas M. and Kiefer, Ralph, W., "Remote Sensing and Image Interpretation", 4th Edition, John Wiley and Sons, New York, 2000
4. Rampal, K.K., Handbook of Aerial Photography and Interpretation, Concept Publishing Company, New Delhi, 1999

PAPER-1.2 FUNDAMENTALS OF GEOGRAPHIC INFORMATION SCIENCES

Section - A

FUNDAMENTAL GEOGRAPHIC CONCEPTS FOR GISCIENCE

Basic Concepts about spatial information, Philosophy and definition of GIS, features, pictures, variables: points, lines, areas, Position on the earth; Geo-referencing; Mapping the earth; Projections and transformations, Spatial relationships, attributes of relationship; scale and geographic detail; generalization, Manual vs Automated GIS

IMPLEMENTING GEOGRAPHIC CONCEPTS IN GISYSTEMS & DATA STRUCTURES

Fundamentals of Data Storage, Information Organization and Data Structure Basic File Structures; Tabular Databases; Advantages of Databases, Types of Databases- hierarchical systems, network systems, relational systems and Object-oriented database systems (OODS), Data Models-Entity Relationship model, Relational Model, Adapting database to GIS use; Data Structures; Raster Structures, Vector Structures, Hybrid Model, Non-spatial Database Models, data modeling

Section - B

SPATIAL DATA INPUT AND EDITING

GIS Data Requirement, sources and collection, Methods of data capture-scanning, digitization and associated errors, Conversion from Other Digital Sources, Attribute data input and management, Edge matching, creating digital data - remote sensing; GPS; data exchange; generating data from existing data ; metadata ;Different Kinds of geospatial data, , Detecting and Evaluating Errors, Data Quality Measurement and Assessment, digital output options;

DATA STORAGE & EXPLORATION

Image storage formats, Data retrieval, Data compression, Supplying the data; Public access to geographic information; Digital Libraries, NSDI,GSDI; geographic information in decision making; human resources and education; Interactive data exploration, Vector & Raster data query, Geographic visualization;

Section - C

RASTER DATA ANALYSIS

Data base and structure, Local operations, Neighborhood operations, Zonal operations, Distance measure operations, Spatial auto correlations, DEM generation, Spatial Modeling, combining data; terrain mapping finding and quantifying relationships; generalization; spatial statistics; geostatistics; spatial interpolation; Artificial Neural Networks for Spatial Data Analysis, interoperability; knowledge base and expert systems; collaborative spatial decision making

VECTOR DATA ANALYSIS

Vector data base , Topological Relationships; Creation of Topology and Error Correction; Accuracy and Precision; The Importance of Error, Accuracy, and Precision, types of error, sources of error, data quality, Spatial interpolation, Overlay Operations and Buffering, Neighborhood functions Distant Measurement , Map Manipulation, Network analyses,

DATA INTEGRATION AND MANAGEMENT

GIS and Remote Sensing data Integration, Thematic Mapping , GIS and Integration of other types of data, Virtual GIS and SDSS, Project design and management, need assessment; conceptual design of the GIS; survey of available data; database planning and design; pilot studies ; GIS system integration; GIS application development; GIS use and maintenance

TEXT BOOKS

1.Kang-tsung Chang 2002, 'Introduction to Geographic Information Systems' Tata McGraw Hill, New Delhi.

2.C.P.Lo and Albert K.W.Yeung 2005 “Concepts and Techniques of Geographic Information Systems” Prentice Hall of India, New Delhi.

REFERENCE BOOKS

1.Burrough, Peter A. and Rachael McDonnell,1998, ‘ Principles of Geographical Information Systems’ Oxford University Press, New York.

2.Magwire, D. J., Goodchild, M.F. and Rhind, D. M. Ed. 1991,‘Geographical Information Systems: Principles and Applications’, Longman Group, U.K.

PAPER-1.2 (Practicals) FUNDAMENTALS OF GEOGRAPHIC INFORMATION SCIENCES

List of Practicals -

Lab 1. Analog to Digital Conversion – Scanning methods

Lab 2. Introduction to software

Lab 3. Digital database creation – Point features, Line features, Polygon features

Lab 4. Data Editing-Removal of errors – Overshoot & Undershoot, Snapping

Lab 5. Data Collection and Integration, Non-spatial data attachment working with tables

Lab 6. Dissolving and Merging

Lab 7. Clipping, Intersection and Union

Lab 8. Buffering techniques

Lab 9. Spatial and Attribute query and Analysis

Lab 10. Contouring and DEM

Lab 11. Advanced Analysis – Network analysis

Lab 12. Advanced analysis – Geo-Processing

Lab 13. Spatial Analysis and Modelling

Lab 14. Layout Generation and report

PAPER-1.3 APPLIED STATISTICS & CARTOGRAPHY AND DIGITAL MAPPING

Section - A

INTRODUCTION

Meaning, Scope and Importance of Statistics, Collection of data - sampling methods; random and systematic method; source of data - primary and secondary, Organization of data - array, frequency, class intervals, histograms, and distribution, Presentation of Data: Tables, Diagrams - Geometric form (bar diagrams, pie-diagrams), Frequency diagrams (histogram, polygon), Arithmetic line graphs (time series graph)

COMPUTATION OF DATA

Grouped data and ungrouped data, Geographical data: discrete and continuous series, scales of measurement, Measures of Central Tendency - mean, median, mode, quartiles, Arithmetic mean, Geometric mean, Harmonic mean, Quadratic mean and their interrelated Relations; Moments, Skewness, Kurtosis, Measures of Dispersion – absolute dispersion (range, quartile deviation, mean deviation, standard deviation), relative dispersion (coefficient of quartile deviation, coefficient of mean deviation, coefficient of variation), Correlation: meaning, scatter diagram, standard deviation, variance, Measures of correlation – Karl Pearson's method (two variables ungrouped data) Spearman's rank correlation methods.

Section - B

PROBABILITY AND THEORY OF SAMPLING

Probability: Binomial, Normal, and Poisson distribution, Theory of Sampling: sampling distributions of means and proportions, standard errors, confidence interval estimation for population means, standard deviations, difference of means, sums, Time series analysis - moving averages

BASIC CONCEPT OF CARTOGRAPHY

Basic Concept, Categories of maps, Interpretation of topographic maps, Cartographic databases, data measurement, cartographic design issues, colour and pattern, map lettering, map compilation, map scale, Generalization, symbolization, dot, isopleth and choropleth mapping, multivariate and dynamic mapping, map production, methods of map printing,

Section - C

PROJECTIONS

Basic Assumptions, Map Projections, Grouping of map projections: conic projection, cylindrical projection, Zenithal, Projection Types: Mercator, Transverse Mercator, Polyconic, Lambert, Orthomorphic, UTM Projections and their comparison, Choosing a Map Projection, Map Projection transformation, Analysis and visualization of distortion,

DIGITAL MAPPING

Computer Cartography, the nature of Data, Database and Data structures, Data Input: Method of data capture, digitization and scanning method, Techniques and procedure for digitizing, Vector and Raster;

Data output: Screen display system, file organization and formats, rectification of digital maps, software for digital mapping.

VISUALIZATION

Visualization of geospatial data: Design aspects, Multiscale and geometric aspects scale, dissemination of (visualized) geospatial data, data products, use and users of products,. 3D Visualization, Various issues in map visualization, Interactive Cartography

PAPER-1.3 (Practicals) CARTOGRAPHY & DIGITAL MAPPING

List of Practical -

- Lab 1. Construction of different types of scales (i) Simple (ii) Comparative
(iii) Diagonal Scale.
- Lab 2. Construction of different types of map projection
Conical projection
Cylindrical Projection
Zenithal Projection
- Lab 3. Preparation of UTM grid
- Lab 4. Base Map
- Lab 5. Designing and Symbolization
- Lab 6. Analog to Digital Conversion
- Lab 7. Analysis of Toposheet
- Lab 8. Updation of Toposheet from Satellite Imagery.

PAPER-1.4 GLOBAL POSITIONING SYSTEMS AND MOBILE MAPPING

Section - A

FUNDAMENTALS OF GPS

Introduction of Global Positioning System, Satellite constellation, GPS signals and data, Geopositioning- Basic Concepts. NAVSTAR, GLONASS

GEODESY

Basic geodesy, Geoid/datum/Ellipsoid,- definition and basic concepts, Coordinate Systems, Special Referencing system, Map Scale, Scale factors, Application of Geodesy-Indian geodetic System

COMPONENTS OF GLOBAL POSITIONING SYSTEM

Control Segment, Space Segments, User Segment, GPS Positioning Types- Absolute Positioning, Differential positioning

Section - B

GPS SURVEYING METHODS AND ACCURACY

Methods-Static & Rapid static, Kinematic-Real time kinematic Survey- DGPS-GPS data processing and Accuracy.

FACTORS AFFECTING GPS ACCURACY

Number of satellites, Multi path, Ionosphere, Troposphere, Satellite Geometry, Satellite signals and its strength, receiver System errors, Radio frequency (RF) interference.

Section - C

REFERENCE STATION, REFERENCE EQUIPMENTS AND RADIOS

Selection of Reference Station, Reference Station Equipment: GPS receiver, GPS antenna. Radio and its types, Radio Antenna

MOBILE MAPPING AND GPS APPLICATIONS

Mobile Mapping basic concepts and Applications , GPS Application in Surveying and Mapping, Navigation Military, Location Based Services, Vehicle tracking, Seismic Applications- Crustal deformation and tectonic movements

TEXT BOOK

1. Leicka. A.: GPS Satellite Surveying, John Wiley & Sons, use. New York
2. Terry-Karen Steede, 2002, Integrating GIS and the Global Positioning System, ESRI Press
3. N.K.Agrawal Essentials of GPS, Spatial Network Pvt Ltd 2004
4. Sathish Gopi , GPS and Surveying using GPS

PAPER-1.4 (Practicals) GLOBAL POSITIONING SYSTEM

List of Practical

- 1) Introduction to Leica GPS and initial setting
- 2) Creating codes and attribute table is Leica GPS receiver
- 3) Point Data collection using GPS with different datum
- 4) Line data collection using GPS and measurements
- 5) GPS data collection for area calculation
- 6) GPS Data collection in DGPS mode.
- 7) Leica Post Processing – Introduction
- 8) Post processing of the GPS data
- 9) Creating attribute table in Leica pro software and Export functions.
- 10) GPS and GIS integrations output preparation

PAPER-1.5: COMPUTER PROGRAMMING

Section - A

BASICS OF COMPUTING

Principles of computing, Generation of computers, Computer System Architecture – Basic Computer organization, CPU, ALU, I/O Units, CU, Types of memory (RAM, ROM), Binary Digits, Boolean Algebra

INTRODUCTION TO PROGRAMMING

Basic concepts, program constructions – flowcharts, algorithms, pseudo codes, data structures – stacks, queues, linked lists etc., approaches to programming – top-down, bottom-up approach, divide & conquer, modular programming

PROGRAMMING LANGUAGES

Procedural and object oriented programming, evaluation of programming languages, constants, expressions, evaluation strategy of expressions, statements, scope and life of variables, modules, subprograms, parameter passing, types and type casting, HLL, LLL, 4GL

Section - B

BASICS OF C LANGUAGE

C Fundamentals, data types, variables, constants, operators, expressions, statements, control structures, C preprocessors,

C WITH FUNCTIONS AND POINTERS

Functions, passing parameters to functions, recursive functions, (Arrays 1-Dimensional and 2-Dimensional), Concepts of Pointers, strings

C WITH USER DEFINED DATA STRUCTURES

User defined data structures – enumerators, unions & structures, File handling (sequential & random files)

Section - C

VISUAL BASIC 6.0 LANGUAGE

Fundamentals VB concepts, data types, variables, constants, operators, expressions, statements, control structures, arrays, functions, Integrated development environment (IDE), MDI, OLE, ActiveX controls, object oriented programming in VB. Customization: definition, types of customization, need of customization, customization using VB.

TEXT BOOKS:

- 4 Scott Warner, “Teach Yourself Visual Basic 6.0”, TMH, 1999.
- 5 MSDN digital library

PAPER-1.5 (Practicals) COMPUTER PROGRAMMING

List of Practical -

- Lab 1. Introduction to computers & programming concept
- Lab 2. Programming using concepts of variables, operators
- Lab 3. Programming using control structures
- Lab 4. Programming using functions and arrays
- Lab 5. Programming using strings
- Lab 6. Programming using data structure
- Lab 7. Programming using file handling
- Lab 8. Creation of forms and using control variables
- Lab 9. Creating menus in forms
- Lab 10. Developing application package
- Lab 11. Creation of execution packages
- Lab 12. Connecting with database
- Lab 13. Adding maps in VB Projects
- Lab 14. Adding database of maps in the projects

SECOND SEMESTER

PAPER-2.1 SPATIAL DATABASE SYSTEMS, ANALYSIS AND MODELING

Section - A

INTRODUCTION

Introduction to Database System: Definition, purpose, data abstraction, instances, schema, DDL, DML, database manager, database administrator, and basic concepts of entity, relationship and primary key. Basic components of computers, Hardware, Software requirements for GIS Processors, Internet, Operating Systems, Programming languages

SPATIAL DATABASE

GIS and Remote Sensing data, Formats & exchange etc: Image storage formats, Data retrieval & Data compression techniques. Data Structures: Geographical data; spatial & non spatial, geographical data in computers, Data Models: Spatial data Model – (i) Cartographic Map model – Raster structure, Quadtree Tassellation (ii) Georelational Model – Vector Data structure, Advantages & Disadvantages of Both

Data base structure: Non spatial: Hierarchical structure, Network structure, Relational Structure ,Spatial Data Bases: Hybrid Data Model, Integrated Data Model. Spatial Data and Data in Thematic Layers, Spatial data in GIS using a Raster data model, Description of spatial data, structures used in GIS, Methods of recording and assessing the quality of spatial data

Section - B

SPATIAL DATABASE CREATION AND EDITING

Creating and Editing Geodatabase Features, Creating and Editing Linearly Referenced Features, Creating, Editing and Managing Geo-databases, Surface analysis

SPATIAL DATABASE QUALITY

Data Quality and Errors in GIS: Nature of geographic data – types of uncertainty in a GIS,.Sources of Errors in GIS data base: Obvious sources from natural variations & original measurements, Errors through processing, errors associated with overlaying of polygons, Data Quality parameters: Positional accuracy, Attribute accuracy, Logical consistency, Completeness Lineage. Handling Errors in GIS,,Normalization in GIS,Levels of Measurements: Nominal, Ordinal, Ratio and Interval Advantages of RDBMS over DBMS

Section - C

DATA RESOURCES AND APPLICATIONS

GIS applications available today, Implications of using spatial data/information, Technological developments in GIS, GIS resources on local and global networks, Number of models, Application of 3-dimensional data in geographical analysis, Role of spatial statistics and related to GIS techniques

SPATIAL DATA ANALYSIS

Data Manipulation Techniques, Overlay Operations and Buffering, Neighborhood functions, Interpolation methods, Factors and Weights, Visibility Elevation Model (DEM) generation, Methods of Spatial analysis. Sapatial Modeling:

Introduction to Modeling & Flowcharting, Map Algebra - Operators & Operations, Functional Operations, Modeling Essentials, Spatial interaction models, Conceptualizing the Model, Model Formulation, Single Criteria vs. Multiple Criteria, Decision-Making, Conflict Resolution and Prescriptive Modeling, Model Verification

TEXT BOOKS

- 3) Samet, H. 1990, The Design and Analysis of Spatial Data Structures, Addison–Wesley.
- 4) A. Silberschats, Henry F. Korth “Database System Concepts”, 3rd Edition, TMH, 1998
- 5) Bonham Carter G.F (1994) GIS for Geoscientists: Modeling with GIS Pergamon Publications.

PAPER-2.1 (Practicals) SPATIAL DATABASE SYSTEMS, ANALYSIS AND MODELING

List of Practical -

1. Concept of entity and relationship.
2. Creation of Tables
- 3,4 and 5. Concept of SQL
6. Performing various actions over table
7. Merging of tables by using primary key
8. Maintaining database

PAPER-2.2: DIGITAL IMAGE PROCESSING

Section - A

INTRODUCTION

Concepts about digital image and its characteristics, Spectral, Spatial, Radiometric and Temporal resolution, Visual vs. Digital methods, Image data storage and retrieval, Types of image displays and FCC

BASIC PRINCIPLES

System design considerations , Sources of image degradation - Image restoration and Noise abatement , Radiometric and Geometric correction technique, Interpolation methods – linear and non linear transformation for geometric corrections

Section - B

IMAGE ENHANCEMENT

Look-up Tables (LUT) and Image display, Radiometric enhancement techniques, Spatial enhancement techniques, Contrast stretching: Linear and non-linear methods

FILTERING TECHNIQUES

Low Pass Filtering: Image smoothing, High Pass Filtering: Edge enhancement and Edge detection , Gradient filters , Directional and non-directional filtering

MULTI-BAND ENHANCEMENT TECHNIQUES

Band ratio, Types of Vegetation indices, Principal Component Analysis, Multi dated data analysis and Change detection

Section - C

PATTERN RECOGNITION

Concept of Pattern Recognition, Multi-spectral pattern recognition, Spectral discrimination, Signature bank, Parametric and Non-Parametric classifiers, Unsupervised

classification methods, Supervised classification techniques, Limitations of standard classifiers

ADVANCED TECHNIQUES

Artificial Intelligence, Fuzzy logic, Neural Networks, Expert systems, Hyperspectral remote sensing, Image compression

TEXT BOOKS:

- 1) Sabins, Floyd F., Remote Sensing: Principles and Interpretation, H. Freeman and C., New York.
- 2) Thomas M. Lillesand & Kiefer, Ralph W., Remote Sensing and Image Interpretation, John Wiley & Sons, New York.
- 3) Jensen, JR., Remote Sensing of the Environment – An Earth Resources Perspective, Prentice Hall Inc.

REFERENCE BOOKS:

- 1) Rencz, Andrew N. (Ed), Remote Sensing for the Earth Sciences: Manual of Remote Sensing, 3rd ed., John Wiley & Sons, Inc., New York.
- 2) Curran, P., Principles of Remote Sensing, Longman, London.
- 3) Campbell, James B., Introductory Remote Sensing: Principles and Concepts, Routledge.
- 4) Gibson, P.J., Introduction to Remote Sensing, 2nd ed., Taylor & Francis, London.
- 5) Cracknell, A.P. & Hayes, L.W B., Introduction to Remote Sensing, Taylor & Francis, London.

PAPER-2.2 (Practicals) DIGITAL IMAGE PROCESSING

List of Practical –

- 1 Introduction to ERDAS IMAGINE 8.5
- 2 Study of the marginal information given on the C.D. Rom/Digital data
- 3 Import / Export of files using ERDAS IMAGINE 8.5
- 4 Geo-reference of the toposheet and imageries
- 5 Display, Analysis and interpretation of black & white images and FCC
- 6 Study of the various contrast enhancement techniques

- 7 Low Pass Filter: Compression of the high frequency component & enhancement of the low frequency component

- 8 High Pass Filter: Compression of the low frequency component and enhancement of the high frequency component

- 9 Sub-setting of area of interest from the satellite image
- 10 Principal Component Analysis
- 11 Resolution Merging
- 12 Unsupervised Classification
- 13 Supervised Classification
- 14 Map composition

PAPER-2.3 SPATIAL DECISION SUPPORT SYSTEMS

Section - A

INTRODUCTION

GIS and decision support systems , SDSS Definition and characteristics , Introduction to decision making process and decision support systems , Introduction of a frame work for planning and decision making , Spatial Decision Making

SDSS Architecture

DATABASE MANAGEMENT

Database management system, Model based management system, Graphical and tabular report generator, User interface

Section - B

ANALYSIS AND DECISION MAKING

Principles and components of multiple-criteria decision making , Main multiple-criteria evaluation methods/techniques

Spatial multiple criteria decision making , Multiple-criteria decision making in spatial data analysis ,

Spatial multiple criteria evaluation in planning and decision making

TECHNOLOGY AND DEVELOPMENT

Development of DSS, Technology levels, Functions and roles, Status of SDSS

Section - C

INTERFACE DEVELOPMENT

Interface development GUI, Tools, Programming languages, Spatial and Non Spatial analysis Modelling

SDSS APPLICATIONS

Micro level planning, Spatial Multimedia techniques, Case studies

PLANNING AND EXECUTION

Planning, User assessment, Capacity building, Modern planning and management

TEXT BOOKS

PAPER-2.4 RESEARCH METHODOLOGY & PROJECT MANAGEMENT

Section - A

Problems of GI research. Identification of problems of regional and Locale level, geographic data sources and natures of data to be used. Hypotheses and Models, Formulation of research schemes.

Preparation of research projects and writing of reports, Preparation of field reports, spatial data, classification and sampling problems. Need for sampling, types of sampling, sample size, sampling area.

Section - B

Project Definition, Importance of Projects and Project Management, Project Management context. Basics of project management, Project formulation, Time management, Budget estimates, Cost-benefit calculation techniques

Project bidding, Project plan, Task Definition, Project Resource, Scheduling, line Management, Project Team.

Section – C

Managing the Projects Activities, Project Administrator, Classification of Projects. Product Management, Problems and opportunities in Projects.

Tools & Methods: Project Communications and Presentation, Project Management Software, Project Administration.

Evolution, Revolution, & Termination of Project, Project Change, End of Projects, Project report preparation.

TEXT BOOKS:

- 1 W.E. Huxold & A.G. Lerinsons Aronoft.S.(1989) Managing Geographic Information Projects.
- 2 Earickson, R., and Harlin, J. (1994) Geographic Measurement & Quantitative Analysis
Macmillan, N.York

REFERENCE BOOKS:

California

PAPER-2.5 APPLICATIONS OF REMOTE SENSING

Section – A

Introduction: Emergence of Remote Sensing technology in application areas, understanding potentials of Remote Sensing in allied sectors, Remote Sensing advantage over conventional techniques. Indian satellite missions with focused applications, Recent trends in Remote Sensing applications.

Application in Land Resource: Remote sensing in mapping soil degradation, impact of surface mining on land resources, forest resources.

Application in Water Resources: Remote sensing in hydrogeomorphological interpretation for groundwater exploration, water quality monitoring, reservoir sedimentation, snow cover mapping and modeling approaches.

Section - B

Application in Disaster Management: Mapping and modeling Landslide hazards, floods, Cyclones Forest fire and drought.

Application in Urban Planning: Mapping urban landuse, transportation network, Utility-Facility mapping, urban sprawl, site selection for urban development, Urban Information System

Section - C

Application in Geo-technical Engineering: Slope stability and drainage network analysis, Digital Terrain Modeling, Geoinformatics in Dam site selection, Highways, and Tunnel Alignment studies.

Application in Environmental Management: Selection of disposal sites for industrial and municipal wastes, solid waste management, Environmental Impact Assessment (EIA)

TEXT BOOKS:

Schultz, G. A. and Engman, E. T. 2000. Remote Sensing in Hydrology and Water Management, Springer-Verlag, Berlin, Germany.

PAPER-2.5 (Practicals) REMOTE SENSING APPLICATIONS

List of Practical -

1. Satellite image based hydrogeomorphological interpretation for ground water targeting.
2. Open cast mining impacts on land resources using satellite images.
3. Mapping flood hazards in a region using satellite images
4. Mapping landslide hazards in a region using satellite images
5. Urban sprawl mapping of a township using satellite images
6. Utility-facility mapping for regional development analysis in GIS
7. Application of Remote Sensing for identification of waste disposal sites.
8. Digital terrain models for selection of dam site and road infrastructure.

MINUTES OF THE MEETING OF BOARD OF STUDIES IN SCHOOL OF EARTH SCIENCES HELD ON 29th DECEMBER, 2018 AT 3.00 P.M. IN THE CONFERENCE ROOM, BHU MANDIR, BANASTHALI VIDYAPITH, RAJASTHAN.

PRESENT

1. Mr. Amit Kumar Mishra	-	Internal Member
2. Dr. Anju Patel	-	Internal Member
3. Mrs. ArpanaChaudhary	-	Internal Member
4. Ms. ArushiRana	-	Internal Member
5. Dr. Ashima Sharma	-	Internal Member
6. Dr. Ashutosh	-	Internal Member
7. Dr. Ashutosh Kumar Pandey	-	Internal Member
8. Ms. ChetnaSoni	-	Internal Member
9. Dr. Chilka Sharma	-	Internal Member
10. Dr. Kartar Singh	-	Internal Member
11. Dr. Kh. Moirangleima	-	Internal Member
12. Dr. MamtaChauhan	-	Internal Member
13. Dr. Ng. Mamata Devi	-	Internal Member
14. Mrs. PradeepikaKaushik	-	Internal Member
15. Dr. Rashmi Sharma	-	Convener
16. Dr. Resmi M.R.	-	Internal Member
17. Dr. SalahuddinMohd.	-	Internal Member
18. Dr. Sarika Singh	-	Internal Member
19. Dr. Subhashree Mishra	-	Internal Member
20. Dr. Vipin Kumar	-	Internal Member
21. Mr. Vivek Deep	-	Internal Member
22. Ms. NishaChoudhary	-	Special Invitee
23. Ms. Rinku Singh	-	Special Invitee
24. Prof. H.S.Sharma	-	External Member
25. Prof. M.G. Thakkar	-	External Member
26. Prof.P.K. Joshi	-	External Member

Note: Prof. H.S.Sharma, Prof. P.K. Joshi, Prof. M.G. Thakkar, Dr. Ng. Mamata Devi and Mrs. PradeepikaKaushik could not attend the meeting.

The meeting started with a welcome of the members by the convener of Board of Studies for School of Earth Sciences, Dr. Rashmi Sharma, Dean, School of Earth Sciences, Banasthali Vidyapith, Rajasthan.

1. The board took up the minutes of its last meeting held on April, 24, 2016.

The Board resolved that the minutes to be confirmed.

2. The board reviewed the existing panel of examiners and suggested to update the address and phone numbers of the existing examiners for each examination of Geography, Geology, Remote Sensing, Environmental Science and Environment Studies of UG, PG,

and M.Phil. examination keeping in view the by-law 15.03.02 of the Vidyapith. Updated panel is sent to the examination and secrecy section.

3. The board reviewed the Study/Curricula, scheme of examination and proposed revisions in various courses of study as follows:

B.A./B.Sc.

i.	First Semester	Minor change ^a
ii.	Second Semester	Minor change ^b
iii.	Third Semester	Minor change ^c
iv.	Fourth Semester	Minor change ^d
v.	Fifth Semester	Major change ^e
vi.	Sixth Semester	Major change ^f

The Board reviewed the objectives, syllabi, learning outcomes of the B.A./B.Sc. (Geography).

(a) In B.A./B.Sc. (Geography) I Semester, revision in the syllabus of *Fundamentals of Cartography Lab* (Course Code: GEOG 101L) was proposed. Board discussed the revision proposed and agreed upon the suggested syllabus. Board also recommended implementing the proposed revision in syllabus of *Fundamentals of Cartography lab* Semester Examination, December, 2019.

(b) In B.A./B.Sc. (Geography) II Semester, revision in the syllabus of *Statistical Techniques and Data Representation lab* (Course Code: GEOG 104L) & *Human Geography* (Course Code: GEOG 102) were proposed. Board discussed the revision proposed and agreed upon the suggested syllabus. Board also recommended implementing the proposed revision in syllabi of *Statistical Techniques and Data Representation lab, Human Geography* Semester Examination, April/May, 2020.

(c) In B.A./B.Sc. (Geography) III Semester, revision in the syllabus of *Introduction to Geography of India* (Course Code: GEOG 202) was proposed. Board discussed the revision proposed and agreed upon the suggested syllabus. Board also recommended implementing the proposed revision in syllabus of *Introduction to Geography of India* Semester Examination, December, 2020.

(d) In B.A./B.Sc. (Geography) IV Semester, revision in the syllabus of *Relief Representation and Topographical Maps lab* (Course Code: GEOG 204L) & *Economic Geography* (Course Code: GEOG 201) were proposed. Board discussed the revision proposed and agreed upon the suggested syllabus. Board also recommended implementing the proposed revision in syllabi of *Relief Representation and Topographical Maps lab, Economic Geography* Semester Examination, April/May, 2021.

(e) In B.A./B.Sc. (Geography) V Semester, revision in the syllabus of *Map Projection lab* (Course Code: 5.2) was proposed. Board discussed the revision proposed and agreed upon the suggested syllabus. Board also recommended implementing the proposed revision in syllabus of *Map Projection lab* Semester Examination, December, 2021. The Board proposed introduction of pool of Discipline Elective courses and agreed upon it. The courses *Geographical Thought* (Course Code: GEOG 302) and *World Regional Geography* (Course Code: GEOG 304) has been shifted in the pool as courses *Geographical Thought* (Course Code: GEOG_to be generated) and *World Regional Geography* (Course Code: GEOG_to be generated) of Discipline electives and another two new courses has also been added.

(f) In B.A./B.Sc. (Geography) VI Semester, revision in the syllabus of *Geographical Thought* (Course Code: GEOG 6.1) was proposed. Board discussed the revision proposed and agreed upon the suggested syllabus.

The Board proposed introduction of pool of Discipline Electives in Semester V and VI also and agreed upon it.

List of Discipline Electives:

Environment and Disaster Management (Course Code: GEOG_to be generated)

Geographical Thought (Course Code: GEOG_to be generated)

Settlement Geography (Course Code: GEOG_to be generated)

World Regional Geography (Course Code: GEOG_to be generated)

Board proposed to introduce Open (Generic) audit/credit Elective and agreed to implement as per Vidyapith policy.

Board also recommended implementing the proposed changes in syllabus from Semester Examination, April/May, 2022.

Board recommended implementation of reviewed Recommended Books and e-learning materials from session 2019-20 in all semesters respectively.

Programme educational objectives, outcomes and the list of courses of the B.A./B.Sc. (Geography) programme is attached and marked as **Annexure –1 (PP. 1-4)**.

The revised syllabus, learning outcomes, list of recommended books and e-learning materials of the B.A./B.Sc. (Geography) programme is attached and marked as **Annexure –2 (PP. 1-37)**.

I. B.Sc. (Geology):

i.	First Semester	Major change ^a
ii.	Second Semester	Major change ^b
iii.	Third Semester	Major change ^c

iv.	Fourth Semester	Major change ^d
v.	Fifth Semester	Major change ^e
vi.	Sixth Semester	Major change ^f

The Board reviewed the objectives, syllabi, learning outcomes of the **B.Sc. (Geology)**.

- a) In B.Sc. Geology I Semester, the courses *Physical Geology and Plate Tectonics* (Course Code: GEOL 102) & *Physical Geology and Plate Tectonics Lab* (Course Code: GEOL 102 L) have been proposed to be replaced by new course *Physical Geology* (Course Code: *to be generated*) containing both theory and practical. Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new course in Semester Examination, December, 2019.
- b) In B.Sc. Geology II Semester, the courses *Mineralogy, Crystallography and Economic Geology* (Course Code: GEOL 101) & *Mineralogy, Crystallography and Economic Geology Lab* (Course Code: GEOL 101L) have been proposed to be replaced by new course *Structural Geology and Plate Tectonics* (Course Code: *to be generated*) containing both theory and practical. Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, April/May, 2020.
- c) In B.Sc. Geology III Semester, the courses *Petrology and Structural Geology* (Course Code: GEOL 202) & *Petrology and Structural Geology Lab* (Course Code: GEOL 202L) have been proposed to be replaced by new course *Mineralogy, Crystallography and Geochemistry* (Course Code: *to be generated*) containing both theory and practical. Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, December, 2020.
- d) In B.Sc. Geology IV Semester, the courses *Palaeontology and Stratigraphy* (Course Code: GEOL 201) & *Palaeontology and Stratigraphy Lab* (Course Code: GEOL 201L) have been proposed to be replaced by new course *Petrology and Economic Geology* (Course Code: *to be generated*) containing both theory and practical. Board discussed the proposed changes and shifting of the courses and agreed upon suggested changes. Board also recommended implementing the proposed changes in the syllabus of new courses in Semester Examination, April/May, 2021.
- e) In B.Sc. Geology V Semester, the courses *Geochemistry, Geomorphology, Photogeology and Remote Sensing* (Course Code: 5.1) & *Geochemistry, Geomorphology, Photogeology and Remote Sensing Lab* (Course Code: 5.2) have been proposed to be replaced by newly introduced pool of Discipline Electives containing both theory and practical. Board discussed the changes proposed and agreed upon the suggested changes. Board also

recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, December, 2021.

- f) In B.Sc. Geology VI Semester, the courses *Hydrogeology, Environmental and Engineering Geology* (Course Code: 6.1) & *Hydrogeology, Environmental and Engineering Geology Lab* (Course Code: 6.2) have been replaced by newly introduced pool of Discipline Electives containing both theory and practical. Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, April/May, 2022.

The Board proposed introduction of pool of Discipline Electives containing both theory and respective practicals and agreed upon it.

List of Discipline Electives:

Applied Geology (Course Code: GEOL_to be generated)

Field Geology: Tools and Techniques (Course Code: GEOL_to be generated)

Geology of Rajasthan (Course Code: GEOL_to be generated)

Palaeontology and Stratigraphy (Course Code: GEOL_to be generated)

Board proposed to introduce Open (Generic) audit/credit Elective and agreed to implement as per Vidyapith policy.

Board recommended implementation of reviewed Recommended Books and e-learning materials from session 2019-20 in all semesters respectively.

Programme educational objectives, outcomes and the list of courses of the B.Sc. (Geology) programme is attached and marked as **Annexure –3 (PP. 1-5)**.

The revised syllabus, learning outcomes, list of recommended books and e-learning materials of the B.Sc. (Geology) programme is attached and marked as **Annexure -4 (PP. 1-55)**.

III. M.A./M.Sc. (Geography):

i.	First Semester	Minor Change ^a
ii.	Second Semester	Minor Change ^b
iii.	Third Semester	Major Change ^c
iv.	Fourth Semester	Major Change ^d

The Board reviewed the objectives, syllabi, learning outcomes of the M.A./M.Sc. (Geography).

The Board discussed the recent trends in Geography at postgraduate level and found that the knowledge of computational software is the necessity of today's research environment. In addition to this, board suggested to give more weightage to self-learning and independent research activities.

(a) In M.A./M.Sc. (Geography) I Semester, the board reviewed the syllabi of *Cartographic Techniques Lab* (Course Code: GEOG 402L). It was found that students had already studied the diagrammatic representation of data manually in their graduation. It was suggested to introduce advanced techniques of this diagrammatic representation using Microsoft Excel at post graduate level. Board also recommended implementing the proposed revision in syllabus of *Cartographic Techniques Lab* Semester Examination, December, 2019.

(b) In M.A./M.Sc. (Geography) II Semester, the board reviewed the syllabi of *Geography of India* (Course Code: GEOG 406) & *Oceanography* (Course Code: GEOG 409) and recommended to add some topics for enrichment and specification. Board also recommended implementing the proposed revision in syllabi of *Geography of India* and *Oceanography* Semester Examination, April/May, 2020.

(c) In M.A./M.Sc. (Geography) III Semester, the board reviewed the syllabi of *Political Geography* (Course Code: GEOG 504), *Research Methodology and Quantitative Techniques* (Course Code: GEOG 507), *Systematic Agricultural Geography* (Course Code: GEOG 510) and *Surveying Lab* (Course Code: GEOG 509L) and recommended to add some topics for enrichment and specification. Board also recommended implementing the proposed revision in syllabi of *Political Geography*, *Research Methodology and Quantitative Techniques*, *Systematic Agricultural Geography* and *Surveying Lab* Semester Examination, December, 2020.

The Board proposed introduction of pool of Discipline Electives and courses of Elective I *Population Geography* (Course Code: GEOG 505) and *Social Geography* (Course Code: GEOG 508) to be shifted in pool of Discipline Electives and agreed upon it.

Board recommended the introduction of Reading Elective I which has to be opted from common pool of Reading Electives in PG courses of School of Earth Sciences (Environmental Science, Geology & Geography).

The Board also recommended implementing the Reading Elective by III Semester Examination, December, 2020.

(d) In M.A./M.Sc. (Geography) IV Semester, the board reviewed the syllabi of *Environmental Geography* (Course Code: GEOG 501), *Remote Sensing and GIS* (Course Code: GEOG 506), *Remote Sensing and GIS Lab* (Course Code: GEOG 506 L), *Geography of Rural Settlements* (Course Code: GEOG 502) and *Urban Geography* (Course Code: GEOG 512) and recommended to add some topics for enrichment and specification. Board also recommended implementing the proposed revision in syllabi of *Environmental Geography*, *Remote Sensing and GIS*, *Remote Sensing and GIS Lab*, *Geography of Rural Settlements* and *Urban Geography* Semester Examination, April/May, 2021.

The Board proposed introduction of pool of Discipline Electives and courses of Elective II *Geography of Rural Settlements*(Course Code: GEOG 502)and *Tourism Geography*(Course Code: GEOG 511) and courses of Elective III *Medical Geography*(Course Code: GEOG 503) and *Urban Geography*(Course Code: GEOG 512) to be shifted in pool of Discipline Electives and agreed upon it.

List of Discipline Electives:

- *Geography of Rural Settlements* (Course Code: GEOG 502)
- *Medical Geography* (Course Code: GEOG 503)
- *Population Geography* (Course Code: GEOG 505)
- *Social Geography* (Course Code: GEOG 508)
- *Tourism Geography* (Course Code: GEOG 511)
- *Urban Geography* (Course Code: GEOG 512)

Board recommended the introduction of Reading Elective II which has to be opted from common pool of Reading Electives in PG courses of School of Earth Sciences (Environmental Science, Geology & Geography).

The Board has proposed the following List of Reading Electives in the curricula:

- *Agroforestry* (Course Code :ENVS_R to be generated)
- *Energy Resources and Conservation* (Course Code: ENVS_R to be generated)
- *Man and Environment* (Course Code :ENVS_R to be generated)
- *Water and Sustainable Development* (Course Code : ENVS_R to be generated)
- *Environmental Challenges and Disaster Management* (Course Code :GEOG_R to be generated)
- *India: Socio-Political and Environmental Scenario* (Course Code: GEOG_R to be generated)
- *Rajasthan: Challenges and Prospects*(Course Code :GEOG_R to be generated)
- *Transforming India* (Course Code: GEOG_R to be generated)
- *Geo Tourism* (Course Code: GEOL_R to be generated)
- *Indian Mineral Deposits, Economics and Mining Ethics* (Course Code: GEOL_R to be generated)
- *Innovation and Entrepreneurship in Earth Sciences* (Course Code: GEOL_R to be generated)
- *Natural Hazards and Disasters* (Course Code: GEOL_R to be generated)

Board proposed to introduce open elective course in Semester IV.

Board recommended implementation of reviewed recommended books and e-learning materials from session 2019-20 in all semesters respectively.

Programme educational objectives, outcomes and the list of courses of the M.A./M.Sc. (Geography) programme is attached and marked as **Annexure –5 (PP. 1-6)**.

The revised syllabus, learning outcomes, list of recommended books and suggested e-learning materials of the M.A./M.Sc. (Geography) programme is attached and marked as **Annexure -6 (PP. 1-80)**.

IV. M.Sc. (Geology):

i.	First Semester	Major change ^a
ii.	Second Semester	Major change ^b
iii.	Third Semester	Major change ^c
iv.	Fourth Semester	Major change ^d

The Board reviewed the objectives, syllabi, learning outcomes of the **M.Sc. (Geology)**.

The course scheme has been changed as earlier there were five credits for lectures and in proposed the credits are four. The credits for Lab are remaining same.

- a) In M.Sc. Geology I Semester, the course *Fuel Geology* (Course Code: GEOL 401) has been proposed to shift to semester III as a pool of discipline elective course and is replaced by modified course *Geochemistry and Isotope Geology* (Course Code: GEOL__ to be generated) from semester III.

Geomorphology (Course Code: GEOL__ to be generated) is suggested to introduce in place of *Ore Genesis and Economic Geology* (Course Code: GEOL 409). Earlier it was present in semester IV.

The courses *Geotectonics and Structural Geology* (Course Code: GEOL 405) & *Mineralogy and Analytical Techniques* (Course Code: GEOL 408) were proposed to be retained with modifications in the same semester as *Geotectonics and Structural Geology* (Course Code: GEOL__ to be generated) & *Mineralogy and Analytical Techniques* (Course Code: GEOL__ to be generated) respectively under revised scheme.

The course *Sedimentary Petrology* (Course Code: GEOL__ to be generated) is proposed to introduce as a modified course under revised scheme. Earlier it was in Semester II as *Sedimentary Petrology* (Course Code: GEOL 410).

The course *Geology Lab-I* (Course Code: GEOL 402L) has been suggested to be replaced with the updated course *Geology Lab-I with Field work* (Course Code: GEOL__L to be generated). Board discussed all the changes proposed in the new syllabus and agreed with the suggested changes. Board also recommended implementing the proposed changes in the syllabus of new courses in Semester Examination, December, 2019.

b) In M.Sc. Geology II Semester, the courses *Geophysics and Exploration Method* (Course Code: GEOL 404), *Igneous Petrology* (Course Code: GEOL 406) & *Metamorphic Petrology* (Course Code: GEOL 407) are proposed to retain in the same semester with minor modifications under revised scheme as *Geophysics and Exploration Method* (Course Code: GEOL__ to be generated), *Igneous Petrology* (Course Code:GEOL__ to be generated) & *Metamorphic Petrology*(Course Code:GEOL__ to be generated). *Sedimentary Petrology* (Course Code: GEOL 410) has been proposed to replace by *Ore Genesis and Economic Geology* (Course Code:GEOL__ to be generated), earlier was in semester I.

The course *Stratigraphy*(Course Code:GEOL 510) was earlier in semester III, suggested to shift to semester II with minor modifications under revised course scheme as *Stratigraphy*(Course Code:GEOL__ to be generated).

The course *Geology Lab-II with Field work* (Course Code: GEOL 403L) has been proposed to replace by new course *Geology Lab-II* (Course Code: GEOL__L to be generated).

Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, April/May, 2020.

c) In M.Sc. Geology III Semester, the course *Geochemistry and Isotope Geology* (Course Code: GEOL 504) have been shifted to semester I and replaced by new course *Hydrogeology*(Course Code: GEOL__to be generated).

Mining and Engineering Geology(Course Code: GEOL 508) has been shifted to pool of discipline electives under new course scheme with minor modifications as *Mining and Engineering Geology*(Course Code: GEOL__to be generated).

Palaeontology (Course Code: GEOL 509) is retained in the same semester under new course scheme with minor modifications *Palaeontology*(Course Code: GEOL__to be generated).

Stratigraphy(Course Code: GEOL 510) is replaced by new course *Remote Sensing and GIS in Geology* (Course Code: GEOL__ to be generated).

Geology Lab-III with Field work(Course Code: GEOL 505L) is retained as *Geology Lab-III with Field work*(Course Code: GEOL__L to be generated) in the same semester with significant modifications.

Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, December, 2020.

Board discussed and recommended to introduce pool of discipline electives in III semester

The complete list of pool of discipline electives is as follows:

- *Environmental Geology* (Course Code: GEOL_ to be generated)
- *Fuel Geology* (Course Code: GEOL_ to be generated)
- *Marine Geology* (Course Code: GEOL_ to be generated)
- *Mining and Engineering Geology* (Course Code: GEOL_ to be generated)

Board recommended the introduction of Reading Elective I which has to be opted from common pool of Reading Electives in PG courses of School of Earth Sciences (Environmental Science, Geology & Geography).

The Board also recommended implementing the Reading Elective by III Semester Examination, December, 2020.

Board proposed to introduce open elective course in Semester III.

- d) In M.Sc. Geology IV Semester, the courses *Concepts of Remote sensing and GIS* (Course Code: GEOL 501) & *Environmental Geology and Hydrogeology* (Course Code: GEOL 503) have been removed and *Geomorphology* (Course Code: GEOL 507) has been shifted to Semester I under revised course scheme.

Geology Lab-IV (Course Code: GEOL 506L) has been removed from the semester. *Dissertation* (Course Code: GEOL 502 D) has been retained as Dissertation (Course Code: GEOL_D to be generated) and now being introduced for the **entire semester** under revised scheme.

Board discussed the changes proposed and agreed upon suggested changes. Board also recommended implementing the proposed replacement in the syllabus of new courses in Semester Examination, April/May, 2021.

Board recommended the introduction of Reading Elective II which has to be opted from common pool of Reading Electives in PG courses of School of Earth Sciences (Environmental Science, Geology & Geography).

The Board has proposed the following Reading Electives in the curricula:

- *Agroforestry* (Course Code :ENVS_R to be generated)
- *Energy Resources and Conservation* (Course Code: ENVS_R to be generated)
- *Man and Environment* (Course Code :ENVS_R to be generated)
- *Water and Sustainable Development* (Course Code : ENVS_R to be generated)
- *Environmental Challenges and Disaster Management* (Course Code :GEOG_R to be generated)
- *India: Socio-Political and Environmental Scenario* (Course Code: GEOG_R to be generated)
- *Rajasthan: Challenges and Prospects*(Course Code :GEOG_R to be generated)
- *Transforming India* (Course Code: GEOG_R to be generated)
- *Geo Tourism* (Course Code: GEOL_R to be generated)
- *Indian Mineral Deposits, Economics and Mining Ethics* (Course Code: GEOL_R to be generated)
- *Innovation and Entrepreneurship in Earth Sciences* (Course Code: GEOL_R to be generated)
- *Natural Hazards and Disasters* (Course Code: GEOL_R to be generated)

Board recommended implementation of reviewed recommended books and e-learning materials from session 2019-20 in all semesters respectively.

Programme educational objectives, outcomes and the list of courses of the M.Sc. (Geology) programme is attached and marked as **Annexure –7 (PP. 1-8)**.

The revised syllabus, learning outcomes, list of recommended books and suggested e-learning materials of the M.Sc. (Geology) programme is attached and marked as **Annexure - 8 (PP. 1-67)**.

Board reviewed the process of Dissertation and recommended formal guidelines for it. The proposed guidelines with evaluation scheme are attached and marked as **Annexure-9 (PP.1)**. Board also recommended implementing the proposed guidelines by IV Semester Examination, April/May, 2021.

IV. M.Sc. (Environmental Science)

i.	First Semester	Major Change ^a
ii.	Second Semester	Major Change ^b
iii.	Third Semester	Major Change ^c
iv.	Fourth Semester	Major Change ^d

The Board reviewed the objectives, syllabi, learning outcomes of the M.Sc. (Environmental Science).

The Board discussed the recent trends in Environmental Science at postgraduate level and found that the knowledge of computational software is the necessity of today's research environment. In addition to this, board suggested to give more weightage to self-learning and independent research activities.

(a) In M.Sc. (Environmental Science I Semester), revision in the syllabi of *Ecology and Environment* (Course Code: ENVS 402), *Environmental Chemistry* (Course Code: ENVS 405) and *Environment Lab - I* (Course Code: ENVS 403 L) were proposed. Board discussed the revision proposed and agreed upon the suggested syllabi. Board recommended implementing the proposed revision in the syllabi of *Ecology and Environment*, *Environmental Chemistry* and *Environment Lab - I* by I Semester Examination, December, 2019.

Board agreed to replace the course *Geography of Environment* (Course Code: ENVS 410) by *Climate Change and Environment* (Course Code: ENVS_to be generated). Board found that proposed syllabus is more elaborated and well arranged. Board recommended implementing the proposed revision in the syllabus of *Climate change and Environment* by I Semester Examination, December, 2019.

(b) In M.Sc. (Environmental Science II Semester), Board reviewed the syllabi of *Biostatistics and Research Methodology* (Course Code: BIO 406) and *Environmental Biology and Toxicology* (Course Code: BIO 408), discussed and agreed that these course should be

replaced by new courses *Environmental Statistics and Research Methodology* (Course Code:ENVS_to be generated) & *Environmental Toxicology* (Course Code:ENVS_to be generated) respectively. Board recommended implementing the proposed changes by II Semester Examination, April, 2020.

Board reviewed the revision in the syllabi of *Environmental Legislation* (Course Code: ENVS 406) & *Environment Lab - II* (Course Code: ENVS 404 L) and agreed upon the suggested syllabi. Board recommended implementing the proposed revision in the syllabi of *Environmental Legislation* along with *Environment Lab - II* respectively by II Semester Examination, April, 2020.

Board suggested replacement of *Environmental Physics* (Course Code: ENVS 407) by *Biodiversity & conservation* (Course Code: ENVS 502), which was an elective course of III semester as *Biodiversity & conservation* (Course Code: ENVS_to be generated) and Board recommended *Environmental Physics* (Course Code: ENVS_to be generated) to be placed in discipline elective pool of III semester. Board discussed the change and agreed upon the suggested syllabus. Board recommended implementing the proposed changes by II Semester Examination, April, 2020.

(c) In M.Sc. (Environmental Science III Semester), Board reviewed the course of *Disaster Management and Mitigation Strategies*(Course Code: ENVS 504) and *Energy Auditing and Conservation*(Course Code: ENVS 505) and suggested that these courses have been replaced by *Air Pollution Monitoring, Control Technology and Management* (Course Code: ENVS 501) & *Water Pollution Monitoring, Control Technology and Management* (Course Code: ENVS 511) as *Air Pollution Monitoring, Control Technology and Management* (Course Code: ENVS_to be generated) & *Water Pollution Monitoring, Control Technology and Management* (Course Code: ENVS_to be generated), which was part of an elective in III semester. Board suggested inclusion of air and water courses should be part of core subjects of Environmental Science. Board recommended *Disaster Management and Mitigation Strategies* (Course Code: ENVS_to be generated) and *Energy Auditing and Conservation* (Course Code: ENVS_to be generated) to be placed in discipline elective pool of III semester.

Board reviewed the revision in the syllabi of *Environment Lab -III* (Course Code: ENVS 506L) agreed upon the suggested syllabi.

Board suggested to shift *Biodiversity and Conservation* (Course Code: ENVS 502) from the pool of Elective to core course in Semester II. *Environmental Impact Assessment and Management* (Course Code: ENVS 508) to be shifted as *Environmental Impact Assessment and Management* (Course Code: ENVS_to be generated) in the Pool of Discipline Elective Semester III from core course of same semester.

Board recommended implementing the proposed changes by III Semester Examination, December, 2020.

Board discussed and recommended to introduce pool of discipline electives in III semester

The complete list of Discipline Electives is as follows:

- *Biotechnology Application to Environmental Science* (Course Code: ENVS to be generated)
- *Disaster Management and Mitigation Strategies* (Course Code: ENVS to be generated)
- *Energy Auditing and Conservation* (Course Code: ENVS to be generated)
- *Environmental Health Management* (Course Code: ENVS to be generated)
- *Environmental Impact Assessment and Management* (Course Code: ENVS to be generated)
- *Environmental Physics* (Course Code: ENVS to be generated)

Board recommended the introduction of Reading Elective I which has to be opted from common pool of Reading Electives in PG courses of School of Earth Sciences (Environmental Science, Geology & Geography).

Board proposed to introduce open elective course in Semester III.

(d) In M.Sc. (Environmental Science IV Semester), Board discussed and agreed modification in credits of *Project* (Course Code: ENVS 509P) and proposed implementation as *Project* (Course Code: ENVS_P to be generated), also proposed the Reading Elective-II in IV semester.

Board recommended the introduction of Reading Elective II which has to be opted from common pool of Reading Electives in PG courses of School of Earth Sciences (Environmental Science, Geology & Geography).

The Board has proposed the following Reading Electives in the curricula:

- *Agroforestry* (Course Code :ENVS_R to be generated)
- *Energy Resources and Conservation* (Course Code: ENVS_R to be generated)
- *Man and Environment* (Course Code : ENVS_R to be generated)
- *Water and Sustainable Development* (Course Code : ENVS_R to be generated)
- *Environmental Challenges and Disaster Management* (Course Code :GEOG_R to be generated)
- *India: Socio-Political and Environmental Scenario* (Course Code: GEOG_R to be generated)
- *Rajasthan: Challenges and Prospects*(Course Code : GEOG_R to be generated)
- *Transforming India* (Course Code: GEOG_R to be generated)
- *Geo Tourism* (Course Code: GEOL_R to be generated)
- *Indian Mineral Deposits, Economics and Mining Ethics* (Course Code: GEOL_R to be generated)
- *Innovation and Entrepreneurship in Earth Sciences* (Course Code: GEOL_R to be generated)

- *Natural Hazards and Disasters* (Course Code: GEOL_R to be generated)

Board recommended implementing the proposed revision in the scheme of *Project* by IV Semester Examination, April, 2021.

Programme educational objectives, outcomes and the list of courses of the M.Sc. (Environmental Science) programme is attached and marked as **Annexure –10 (PP. 1-6)**.

Board recommended implementation of reviewed recommended books and e-learning materials from session 2019-20 in all semesters respectively.

The revised syllabus, learning outcomes, list of recommended books and suggested e-learning materials of the M.Sc. (Environmental Science) programme is attached and marked as **Annexure -11 (PP. 1-88)**.

Board reviewed the process of *Project* and recommended formal guidelines for it. The proposed guidelines with evaluation scheme is attached and marked as **Annexure-12 (PP. 1)**.

Board also recommended implementing the proposed guidelines by IV Semester Examination, April/May, 2021.

V. M. Phil. (Geography):

Board discussed the curriculum structure of M.Phil. (Geography) and proposed further discussion in Faculty meeting. (Annexure I)

Board recommended implementation of reviewed Recommended Books and e-learning materials from session 2019-20 in all semesters respectively.

VI. M.Tech. (Remote Sensing):

i.	First Semester	Major Change ^a
ii.	Second Semester	Major Change ^b
iii.	Third Semester	Major Change ^c
iv.	Fourth Semester	Major Change ^d

Board reviewed the scheme of M.Tech. and recommended to introduce discipline electives and Term paper/Minor project/Seminar in semester I & II with modified credit. Board also recommended introduction of open elective in semester II. Board suggested to replace existing lab with restructured labs.

- (a) In M.Tech. (Remote Sensing) I Semester, Board reviewed the syllabi of *Fundamentals of Geographic Information Sciences and Digital Cartography*(Course Code: RS 504), *GIS Programming and Scripting* (Course Code: RS 505), *Microwave, Thermal and Hyperspectral Remote Sensing* (Course Code: RS 506), *Principles of Remote Sensing* (Course Code: RS 508), *Fundamentals of Geographic Information Sciences and Digital Cartography Lab* (Course Code: RS 504L), *GIS Programming and Scripting Lab* (Course Code: RS 505L), and *Microwave, Thermal and Hyperspectral Remote Sensing Lab* (Course Code: RS 506L) and found that few topics need to be reordered, modified and detailed for adequate and systematic approach. It was suggested to introduce recent technologies and essential application following the modified national security policies and advanced data, tools and techniques for underpinning the essential component for further research. It was suggested to introduce discipline elective I and discipline elective II and shift courses *GIS Programming and Scripting* (Course Code: RS__to be generated), *Microwave, Thermal and Hyperspectral Remote Sensing*(Course Code: RS__to be generated), *Applied Statistics and Research Methodology* (Course Code: RS__to be generated) to pool of discipline electives. Introduction of Term paper-I /Minor project-I/Seminar-I was suggested. *Fundamentals of Geographic Information Sciences and Digital Cartography Lab* (Course Code: RS 504L) and *GIS Programming and Scripting Lab* (Course Code: RS 505L) was combined as new Remote Sensing Lab-II (Course Code: RS_L to be generated) and *Microwave, Thermal and Hyperspectral Remote Sensing Lab* (Course Code: RS506L) and *Principles of Remote Sensing Lab* (Course Code: RS 508L) was combined as new Remote Sensing Lab-I (Course Code: RS_L to be generated). *Applied Statistics and Research Methodology Lab* (Course Code: RS 502L) was proposed to remove. Board proposed and agreed to implement the revision in syllabi and introduction of new components of above mentioned courses by I Semester Examination, December, 2019.
- (b) In M.Tech. (Remote Sensing)II Semester,Board reviewed the syllabi of *Applications of Remote Sensing*(Course Code: RS 501), *Digital Image Processing* (Course Code: RS 503), *Photogrammetry, Global Positioning Systems and Mobile Mapping* (Course Code: RS 507), *Spatial Database Systems, Analysis and Modeling* (Course Code: RS 509), *Spatial Decision Supports Systems* (Course Code: RS 510), *Applications of Remote Sensing Lab* (Course Code: RS 501L), *Digital Image Processing Lab* (Course Code: RS 503L) and *Photogrammetry, Global Positioning Systems and Mobile Mapping Lab* (Course Code: RS 507L) and found that few topics need to be reordered, modified and detailed for adequate and systematic approach. It was suggested to introduce recent technologies and essential application following the modified national security policies and advanced data, tools and techniques for underpinning the essential component for further research. It was suggested to introduce discipline elective III and open elective and shift courses *Applications of Remote Sensing* (Course Code: RS__to be generated), *Spatial Database Systems, Analysis and Modeling* (Course Code: RS__to be generated), *Spatial Decision Supports Systems* (Course Code: RS__to be generated) to pool of discipline electives. Introduction of Term paper-II /Minor project-II/Seminar-II was suggested. *Digital Image Processing Lab* (Course Code: RS 503L) and *Applications of Remote Sensing Lab* (Course Code: RS 501L) was combined as new Remote Sensing Lab-III (Course Code: RS_L to be generated) and *Photogrammetry, Global Positioning Systems and Mobile Mapping* (Course Code: RS 507) and *Spatial Database Systems, Analysis and Modeling Lab* (Course Code: RS 509L), was combined as new Remote Sensing Lab-IV (Course Code: RS_L to be generated). Board proposed and agreed to implement the revision in syllabi and introduction of new components of above mentioned courses by II Semester Examination, April/May, 2020.

List of Discipline Electives:

Applications of Remote Sensing(Course Code: RS_to be generated)

Applied Statistics and Research Methodology(Course Code: RS_to be generated)

Geospatial Entrepreneurship (Course Code: RS_to be generated)

Geospatial Intelligence(Course Code: RS_to be generated)

GIS Programming and Scripting(Course Code: RS_to be generated)

Microwave, Thermal and Hyperspectral Remote Sensing(Course Code: RS_to be generated)

Spatial Database Systems, Analysis and Modeling(Course Code: RS_to be generated)

Spatial Decision Supports Systems(Course Code: RS_to be generated)

(c) In M.Tech. (Remote Sensing) III Semester, Board reviewed the list of reading electives and found that the course *Geoinformatics in Human Settlement Analysis*(Course Code: RS 601R) should be replaced by *Spatial Planning and Urban Development* (Course Code: RS _ R to be generated), the course *Pattern Recognition and Processing* (Course Code: RS 602R) should be replaced by *Geospatial BigData: Challenges and Opportunities* (Course Code: RS _ R to be generated) and the course *Remote Sensing in Environment Studies* (Course Code: RS 605R) should be replaced by *Environmental Remote Sensing and Modeling* (Course Code: RS _ R to be generated) and shifted to the pool of reading electives. Board also suggested that some more emerging technologies and national programmes should be added. Board proposed and agreed to implement the syllabus by III Semester Examination, December, 2020.

(d) In M.Tech. (Remote Sensing) IV Semester, Board reviewed the list of reading electives and found that the course *Remote Sensing in hydrology and water resources*(Course Code: RS _R to be generated), should be modified, as there are significant changes in syllabi and few topics need to be reordered and detailed for adequate and systematic approach. The board also found that the course *Remote Sensing in Resource Management* (Course Code: RS 607R) should be replaced by *Geo-informatics for Resource Management* (Course Code: RS _ R to be generated) and the course *Spatial Modeling and Resource Model* (Course Code: RS 608R) should be replaced by *Open Source Software, Services and Utility Application* (Course Code: RS _ R to be generated) and shifted to the pool of reading electives. Board also suggested that some more emerging technologies and national programmes should be added. Board proposed and agreed to implement the syllabus by IV Semester Examination, April/May, 2021.

The Board also recommended implementing the reading electives by Session 2020-2021.

Board recommended implementation of reviewed Recommended Books and e-learning materials from session 2019-20 in all semesters respectively.

Programme educational objectives, Programme specific outcomes and the list of courses of the M.Tech. (Remote Sensing) programme is attached and marked as **Annexure –13 (PP. 1-5)**.

The revised syllabus, learning outcomes, list of recommended books and e-learning materials of the M.Tech. (Remote Sensing) programme is attached and marked as **Annexure -14 (PP. 1-74)**.

In M.Tech. (Remote Sensing) III Semester, Board reviewed the process of *Project (Part I)* (Course Code: RS 603P) and recommended formal guidelines for it. The proposed guidelines with evaluation scheme is attached and marked as **Annexure-15 (PP. 1)**. Board also recommended implementing the proposed guidelines by III Semester Examination, December, 2020.

In M.Tech. (Remote Sensing) IV Semester, Board suggested that similar guidelines **Annexure-15(PP. 1)**.as suggested for *Project (Part I)* (Course Code: RS 603P), should be followed for *Project (Part II)* (Course Code: RS 604P). Board also recommended implementing the proposed guidelines by IV Semester Examination, April/May, 2021.

4. Board reviewed the curriculum for the courses running in the other programs of the Vidyapith. Following suggestions were given

Bachelor of Arts and Bachelor of Education		
GEOG 101L	Fundamentals of Cartography lab	Minor Change
GEOG 102	Human Geography	Minor Change
GEOG 103	Physical Geography	No change
GEOG 104L	Statistical Techniques and Data Representation lab	Minor Change
GEOG 201	Economic Geography	Minor Change
GEOG 202	Introduction to Geography of India	Minor Change
GEOG 203L	Mapping and Prismatic Compass Survey lab	No change
GEOG 204L	Relief Representation and Topographical Maps lab	Minor Change
GEOG 301L	Fundamentals of Geoinformatics lab	No change
GEOG 302	Geographical Thought	Major Change
GEOG 303L	Map Projection lab	Minor Change
GEOG 304	World Regional Geography	Major change

The Board proposed introduction of pool of Discipline Elective courses and agreed upon it. The courses *Geographical Thought* (Course Code: GEOG 302) and *World Regional Geography* (Course Code: GEOG 304) has been shifted in the pool as courses *Geographical Thought* (Course Code: GEOG_ to be generated) and *World Regional Geography* (Course Code: GEOG_ to be generated) of Discipline electives and another two new courses has also been added.

The board reviewed the courses of Bachelor of Arts and Bachelor of Education and recommended to implement as per **Annexure 1 (PP. 1-4) & Annexure 2(PP. 1-38)** .

Bachelor of Science and Bachelor of Education		
GEOG 101L	Fundamentals of Cartography lab	Minor Change
GEOG 102	Human Geography	Minor Change
GEOG 103	Physical Geography	No change
GEOG 104L	Statistical Techniques and Data Representation lab	Minor Change
GEOG 201	Economic Geography	Minor Change
GEOG 202	Introduction to Geography of India	Minor Change
GEOG 203L	Mapping and Prismatic Compass Survey lab	No change
GEOG 204L	Relief Representation and Topographical Maps lab	Minor Change
GEOG 301L	Fundamentals of Geoinformatics lab	No change
GEOG302	Geographical Thought	Major Change
GEOG 303L	Map Projection lab	Minor Change
GEOG 304	World Regional Geography	Major change
GEOL 101	Mineralogy, Crystallography and Economic Geology	Major Change
GEOL 101L	Mineralogy, Crystallography and Economic Geology Lab	Major Change
GEOL 102	Physical Geology and Plate Tectonics	Major Change
GEOL 102L	Physical Geology and Plate Tectonics Lab	Major Change
GEOL 201	Palaeontology and Stratigraphy	Major Change
GEOL 201L	Palaeontology and Stratigraphy Lab	Major Change
GEOL 202	Petrology and Structural Geology	Major Change
GEOL 202L	Petrology and Structural Geology Lab	Major Change
GEOL 301	Hydrology, Environmental and Engineering Geology	Major Change
GEOL 301L	Hydrology, Environmental and Engineering Geology Lab	Major Change
GEOL 303	Geochemistry, Geomorphology, Photogeology and Remote Sensing	Major Change
GEOL 303L	Geochemistry, Geomorphology, Photogeology and Remote Sensing Lab	Major Change

In B.Sc. Geology I Semester, the courses *Physical Geology and Plate Tectonics* (Course Code: GEOL 102) & *Physical Geology and Plate Tectonics Lab* (Course Code: GEOL 102

L) have been proposed to be replaced by new course *Physical Geology* (Course Code: *to be generated*) containing both theory and practical. In B.Sc. Geology II Semester, the courses *Mineralogy, Crystallography and Economic Geology* (Course Code: GEOL 101) & *Mineralogy, Crystallography and Economic Geology Lab* (Course Code: GEOL 101L) have been proposed to be replaced by new course *Structural Geology and Plate Tectonics* (Course Code: *to be generated*) containing both theory and practical. In B.Sc. Geology III Semester, the courses *Petrology and Structural Geology* (Course Code: GEOL 202) & *Petrology and Structural Geology Lab* (Course Code: GEOL 202L) have been proposed to be replaced by new course *Mineralogy, Crystallography and Geochemistry* (Course Code: *to be generated*) containing both theory and practical. In B.Sc. Geology IV Semester, the courses *Palaeontology and Stratigraphy* (Course Code: GEOL 201) & *Palaeontology and Stratigraphy Lab* (Course Code: GEOL 201L) have been proposed to be replaced by new course *Petrology and Economic Geology* (Course Code: *to be generated*) containing both theory and practical. In B.Sc. Geology V Semester, the courses *Geochemistry, Geomorphology, Photogeology and Remote Sensing* (Course Code: 5.1) & *Geochemistry, Geomorphology, Photogeology and Remote Sensing Lab* (Course Code: 5.2) have been proposed to be replaced by newly introduced pool of Discipline Electives containing both theory and practical. In B.Sc. Geology VI Semester, the courses *Hydrogeology, Environmental and Engineering Geology* (Course Code: 6.1) & *Hydrogeology, Environmental and Engineering Geology Lab* (Course Code: 6.2) have been replaced by newly introduced pool of Discipline Electives containing both theory and practical.

The board reviewed the courses of Bachelor of Science and Bachelor of Education and recommended to implement as per **Annexure 1 (PP. 1-4) & Annexure 2 (PP. 1-37) and Annexure 3 (PP. 1-5) & Annexure 4 (PP. 1-55).**

Master of Arts (Textile Designing - Printing)		
ENVS 408	Environmental Studies	Deal by Design Department
Master of Arts (Textile Designing - Weaving)		
ENVS 408	Environmental Studies	Deal by Design Department

It will be submitted by Design Department.

Bachelor of Technology (Computer Science and Engineering)		
RS 401	Geoinformatics	No change
Bachelor of Technology (Electronics and Communication Engineering)		
RS 401	Geoinformatics	No change
Bachelor of Technology (Information Technology)		
RS 401	Geoinformatics	No change

Bachelor of Technology (Electronics and Electricals)		
RS 401	Geoinformatics	No change
Bachelor of Technology (Electronics and Instrumentation)		
RS 401	Geoinformatics	No change
Bachelor of Technology (Biotechnology)		
RS 401	Geoinformatics	No change

The Board also recommended to introduce RS 401 Geoinformatics in Chemical Engineering Fourth Year.

The course scheme, learning outcomes, list of recommended books and e-learning materials of the (RS 401 Geoinformatics) programme is attached and marked as **Annexure- 16 (PP.1) and 17 (PP. 1-2)**.

5. Board reviewed the reports received from the examiners of different examinations of 2017 and 2018. All the reports were found to be satisfactory. It was noted that the examiners have generally reported 'to the point' answers and have found expression/method of representation satisfactory/good. Few examiners suggested to give more emphasis on maps & charts, graphical representation and labeled diagrams to support their answers.

6. The board evaluated the semester examination papers and found that most of them were descriptive and few analytic & application based depending on the nature of course. The Board concluded that the quality of question papers is good but sometimes some questions are out of syllabus, format is not clear, so, the board recommended for consideration of the syllabi while setting question papers.

The analysis of question papers is enclosed in **Annexure-18 (PP. 1-9)**.

7. a).

Foundation Course (Environment Studies)		
BVF 002	Environment Studies	No change

Board reviewed the learning outcomes and syllabus and agreed to continue with the existing syllabus of *Environment Studies*(Course Code:BVF 002).

The course scheme, learning outcomes, list of suggested books and e-resources of the Foundation Course (Environment Studies)programme is attached and marked as **Annexure-19(PP. 1) and Annexure - 20 (PP. 1)**.

b). Online courses

The Board suggested to introduce online courses as a substitute of Reading Electives in PG Programmes in III & IV Semester, respectively of School of Earth Sciences.

List of Alternate online courses (to be given in BOS minutes)

S No	Agency/ Portal	Name of course	Duration	(Core/ Elective/ Reading Elective)	Credit point(s)	URL
In M.Sc.(Environmental Science/Geology/ Geography) and M.A. (Geography) III & IV Semester Reading Electives						
1	Indian Institute of Technology Roorkee, NPTEL	Mineral Resources: Geology, Exploration, Economics and Environment	Self paced 48h (Registration at any time)	Reading Elective I	2	https://onlinecourses.nptel.ac.in/noc18_ge13/preview
2	Indian Institute of Technology Kanpur, NPTEL	Natural Hazards Part 1	Self paced 48h (Registration at any time)	Reading Elective I	2	https://onlinecourses.nptel.ac.in/noc19_
3	Indian Institute of Technology Madras, NPTEL	Non-Conventional Energy Resources	Self paced 48h (Registration at any time)	Reading Elective II	2	https://onlinecourses.nptel.ac.in/noc18_ge09/preview

The alternate online course name, duration, credits and URL is attached and marked as **Annexure -21(PP. 1)**.

BANASTHALI VIDYAPITH
SCHOOL OF EARTH SCIENCES
MASTER OF TECHNOLOGY (REMOTE SENSING)

Annexure- 13

Name of Programme: M. Tech. (Remote Sensing)

Programme Educational Objectives:

Banasthali Vidyapith is an epitome of tradition and modernity. Vidyapith aims to preserve and inculcate the essential values and ideals of Indian culture. It believes in simple living and high thinking. Our educational ideology is based on the concept of fivefold education focusing on physical, practical, aesthetic, moral and intellectual aspects in order to develop a balanced personality.

Realizing the potential of Remote Sensing Technology in Natural Resource management, Banasthali Vidyapith, took the lead in establishing the first Remote Sensing M.Tech. Programme for Women in India to cater the human resource development in scientific field of remote sensing. M.Tech. students carried out their dissertation research at various esteemed institutions and multinational industries, i.e., ISRO, DRDO, and NIH.

The M.Tech. Remote Sensing programme offers a flexible and complete education in the field of Remote Sensing technology and Geoinformatics. Students will comprehend the major Earth surface imaging systems and Geomatics based research & development. The integrated Remote Sensing technology plays a major role in natural resource management and develops multidisciplinary research environment.

The main objectives of the M.Tech. Remote Sensing programme are:

- To strengthen the ability for assessing and solving the real-time geospatial problems.
- To inculcate skills for developing realistic solutions to the challenges of emerging field of earth observation technology.
- To provide an adequate professional and technical environment that assists both in academia and industries
- To acquire skills in leaning modern earth observation techniques such as SAR, hyper-spectral, thermal and LiDAR scanning for mapping, modeling and monitoring.
- To prepare students for solving complex engineering problems by using innovative research.

Programme Outcomes (PO)

PO1: Remote Sensing Knowledge: Describe the standard principle and concepts of advance 'Earth Observation' (EO) Technologies that ensure the effective use of Geoinformatics based generic applications to solve concurrent global and regional environmental problems.

PO2: Problem Analysis: Formulate robust, generic and ubiquitous research methodologies and approaches based on 'close-to-far' range remote sensing technology to resolve issues associated with natural resources.

PO3: Design/Development of Solutions: Develop and distribute free tools and realistic solutions based on Geoinformatics that can assist in natural resource management, environmental resiliency and infrastructure to expedite information sharing, which can be adapted and tailored to societal needs.

PO4: Conduct investigations of complex problems: Implement the Geoinformatics based operational research methods and optimization techniques in the extension of Geospatial policy for both academia and industrial arena. Share professional acumen to provide intellectual solutions for the complex geospatial problems with valid conclusions.

PO5: Modern tool usage: Construct, relate, and implement suitable geospatial techniques, industrialized resources, and cutting-edge Information Technology (IT) tools to forecast and modeling to manifold engineering activities with generous societal benefits.

PO6: Remote Sensing professionals and society: Implement the contemporary technical information and improved understanding of mapping sciences to encourage the development of responsible societal applications of Remote Sensing, Geographical Information Systems (GIS) and associate technologies.

PO7: Environment and sustainability: Perceive and relate the acceleration and impact of earth observation science, resource use, which increased the urgency to obtain quantitative, timely information about the environment at a variety of scales in space and time.

PO8: Professional ethics: Identify the significance of transparency in sharing of geospatial information in terms of a national policy to ensure data availability, accessibility, and quality to meet development goals of national mapping and imaging agencies, in accordance with issues associated to national security and intellectual integrity.

PO9: Individual and team work: Contribute as a team leader as well as individual in multi-disciplinary research groups in order to achieve common goals. Offer rational decisions based on objectivity to solve complex geospatial problems.

PO10: Communication: Empathize with relative arguments derived by the professionals during execution of the various global technological events. Create, design and disseminate effective reports, scientific articles and deliver presentations from different platforms.

PO11: Project management and finance: Demonstrate considerate interactions and knowledge of the remote sensing technology in real-time project management. Implement principles of project management into fields of applied remote sensing and interdisciplinary environments.

PO12: Life-long learning: Develop an attitude to ensure independent learning with value-added motivation in promptly changing scenario of global technical competence. Retain life-long intellect based on attained technological skills for sustainable development.

Programme Scheme:

Semester I

Existing					
CourseCode	Course Name	L	T	P	C
RS502	Applied Statistics and Research Methodology	4	0	0	4
RS504	Fundamentals of Geographic Information Sciences and Digital Cartography	4	0	0	4
RS505	GIS Programming and Scripting	4	0	0	4

List of Reading Electives

Proposed					
Course Code	Course Name	L	T	P	C
RS__R	Environmental Remote Sensing and Modeling	0	0	0	2
RS__R	Geo-informatics for Resource Management	0	0	0	2
RS__R	Geospatial BigData: Challenges and Opportunities	0	0	0	2
RS__R	Open Source Software, Services and Utility Application	0	0	0	2
RS__R	Remote Sensing in Hydrology and Water Resources	0	0	0	2
RS__R	Spatial Planning and Urban Development	0	0	0	2

Note:

Semester I

Introduction of Discipline electives and Term Paper –I/Minor Project-I/Seminar-I .

RS502L Applied Statistics and Research Methodology Lab has been removed.

RS508L Principles of Remote Sensing Lab and RS506L Microwave, Thermal and Hyperspectral Remote Sensing Lab has been combined in Remote Sensing Lab-I

RS504L Fundamentals of Geographic Information Sciences and Digital Cartography Lab and RS505L GIS Programming and Scripting Lab has been combined in Remote Sensing Lab-II

Semester II

Introduction of Discipline elective, open elective and Term Paper –II/Minor Project-II/Seminar-II.

RS503L Digital image processing Lab and RS501L Applications of remote sensing Lab has been combined in Remote Sensing Lab-III

RS507L Photogrammetry, Global Positioning System and mobile mapping Lab and RS509L Spatial database systems, analysis and modeling Lab has been combined in Remote Sensing Lab-IV

Semester III

RS601R Geoinformatics in Human Settlement Analysis has been replaced by new course RS__R Spatial Planning and Urban Development

RS602R Pattern Recognition and Processing has been replaced by new course RS__R Geospatial BigData: Challenges and Opportunities

RS605R Remote Sensing in Environment Studies has been replaced by new course RS__R Environmental Remote Sensing and Modeling

Semester IV

RS607R Remote Sensing in Resource Management has been replaced by new course RS__R Geo-informatics for Resource Management

RS608R Spatial Modeling and Resource Model has been replaced by new course RS__R Open Source Software, Services and Utility Application

Pool of Reading electives has been introduced in III and IV semester

NOTE: Yellow highlighted and bold content illustrate the modification in the syllabus.

BANASTHALI VIDYAPITH
SCHOOL OF EARTH SCIENCES
MASTER OF TECHNOLOGY (REMOTE SENSING)

Annexure-14

Name of Programme: M. Tech. (Remote Sensing)

Course Details:

FIRST SEMESTER

S. N.	Course List	Learning Outcome	Existing Syllabus	Suggested Syllabus	Remarks
1.	RS-502: Applied Statistics and Research Methodology	<p>After the completion of this course, students should be able to:</p> <ul style="list-style-type: none"> • Formulate research problems using geo-statistical methods. • Apply statistical knowledge to the geospatial variability. • Define research problems and selection of survey methods. • Writing project proposal for various funding 	<p style="text-align: center;">Section A</p> <p>DATA DISTRIBUTION AND BASIC STATISTICS Scope and importance of statistics, Source of data-primary and secondary, Collection of data-sampling methods; Random and systematic method; Organization of data-array, Frequency, Class intervals, Histograms, and distribution, Presentation of data-Tables, Diagrams; Geometric form (Bar diagrams, Pie-diagrams), Frequency diagrams (histogram, polygon), Arithmetic line graphs (time series graph); Data grouping, Geographical data- Discrete and continuous series, Scales of measurement, Measures of central tendency-Mean, Median, Mode, Quartiles, Arithmetic mean, Geometric mean, Harmonic mean, Quadratic mean and their interrelated relations; Measures of dispersion-Absolute dispersion (range, quartile deviation, mean deviation, standard deviation); Relative dispersion (Coefficient of quartile deviation, Coefficient of variation), Moments, Skewness, Kurtosis</p> <p style="text-align: center;">Section B</p> <p>CORRELATION, PROBABILITY AND HYPOTHESIS TESTING Correlation-meaning, Scatter diagram, standard deviation, Variance, Measures of Correlation-Karl Pearson's method (Two variables ungrouped data) Spearman's rank correlation methods.</p>	Discipline Elective	This course has been shifted from core course of I semester to elective Pool

S. N.	Course List	Learning Outcome	Existing Syllabus	Suggested Syllabus	Remarks
		agencies.	<p>Probability-Binomial, Normal, and Poisson distribution; Theory of Sampling - Sampling distributions of means and proportions, Standard errors, Confidence interval estimation for population means, Standard deviations, Testing of Hypothesis – Large and small sample test.</p> <p>BASIC CONCEPT OF RESEARCH METHODOLOGY</p> <p>Definition of Research Problem, Identification of problems of regional and Local level, Considerations in selection of problem, Research process, Review of literature, Research objectives and research questions, Research scheme/design.</p> <p style="text-align: center;">Section C</p> <p>DATA COLLECTION, ANALYSIS AND REPORTS</p> <p>Methods of data collection, Survey methods, Samples-Type and methods, Data processes and analysis, Reporting of results, References, Future scope of work.</p> <p>PREPARATION OF RESEARCH PROJECTS</p> <p>Writing of proposals, Objectives of project, Research hypothesis and design, Research Questions, Scope of project, Brain storming sessions, Finalization of methodology, Review of similar studies and present level of research, Time scheduling (PERT), Financial estimates, Submission of Proposal.</p> <p>Project planning, Project activities/tasks, Feasibility, Resource requirements and allocation, Project management software, Project review, Project Completion-Quality assurance, Evaluation of individual tasks, Financial auditing, Problems and opportunities in Projects.</p> <p>TEXT BOOK</p> <p>T1 Paul L. Meyer: Introductory Probability and Statistical Applications, Addison-Wesley</p> <p>T2 Gupta. S. C. and Kapoor. V. K., 2000," Fundamental of</p>
