The first English laws were public in nature, but by the 19th century, intellectual property had become classified as a type of private law. Again, TRIPS agreement has reinforced the public nature of intellectual property rights leading many developing countries to change their laws and policies on Intellectual Property. Besides, one can always see old rights changing and new rights being created all the time. Thus, this paper aims in understanding the international perspective of IP law,</p>	<p>Note: The paper will contain 3 questions from every section aggregating nine questions.
